**AMENDMENTS TO THE CLAIMS:**

**Please cancel claims 33 and 40 without prejudice or disclaimer.**

1-7. (Canceled)

8. (Currently amended) A semiconductor substrate comprising:  
a trench region comprising at least one trench, said trench comprising a single layer of ~~doped~~ high-density plasma (HDP) oxide having an unpolished upper surface; and  
a non-trench region having an upper surface which is substantially co-planar with said unpolished upper surface of said single layer of said HDP oxide, said upper surface of said non-trench region comprising implanted dopants,  
wherein a thickness of said single layer of HDP oxide comprises an as-deposited thickness.

9-14. (Canceled)

15. (Currently amended) A semiconductor substrate comprising:  
a trench region comprising a plurality of trenches, each of said trenches comprising a single layer of ~~doped~~ high density plasma (HDP) oxide having an unpolished upper surface; and  
a non-trench region having an upper surface which is substantially co-planar with said unpolished upper surface of said single layer of said seamless HDP oxide, wherein said upper surface of said non-trench region comprising comprises implanted dopants,  
wherein a thickness of said single layer of HDP oxide comprises an as-deposited thickness.

16-22. (Canceled)

23. (Currently amended) A semiconductor substrate comprising:

Serial No. 09/883,981  
Docket No. BU9-98-225DIV

3

a trench region comprising at least one wide trench and at least one narrow trench, each of said trenches comprising a single layer of doped high density plasma (HDP) oxide having an unpolished upper surface; and

a non-trench region having an upper surface which is substantially co-planar with said unpolished upper surface of said single layer of said seamless HDP oxide, wherein said upper surface of said non-trench region comprising comprises implanted dopants,

wherein a thickness of said single layer of HDP oxide comprises an as-deposited thickness.

24. (Previously presented) The semiconductor substrate according to claim 8, wherein said high density plasma oxide comprises non-conformal high density plasma oxide.

25. (Previously presented) The semiconductor substrate according to claim 8, wherein said at least one trench comprises at least one wide trench and at least one narrow trench.

26. (Currently amended) The semiconductor substrate according to claim 8, wherein said doped high density plasma oxide comprises fluorine-doped high density plasma oxide.

27. (Previously presented) The semiconductor substrate according to claim 1, wherein said high density plasma oxide comprises silicon dioxide.

28. (Previously presented) The semiconductor substrate according to claim 24, wherein said high density plasma oxide comprises silicon dioxide doped with fluorine.

29. (Previously presented) The semiconductor substrate according to claim 8, wherein said surface of said filler material and said surface of said substrate are planarized without reactive ion etching.

Serial No. 09/883,981  
Docket No. BU9-98-225DIV

4

30. (Previously presented) The semiconductor substrate according to claim 8, wherein said at least one trench comprises shallow trench isolations.
31. (Previously presented) The semiconductor substrate according to claim 8, wherein said upper surface of said single layer of HDP oxide and said upper surface of said non-trench region are planarized without chemical mechanical polishing.
32. (Previously presented) The semiconductor substrate according to claim 8, wherein said upper surface of said single layer of HDP oxide is substantially scratch-free.
33. (Canceled)
34. (Previously presented) The semiconductor substrate according to claim 8, further comprising:  
a thin oxide layer grown on said upper surface of said substrate.
35. (Previously presented) The semiconductor substrate according to claim 8, wherein said upper surface of said single layer of HDP oxide is free of chatter marks.
36. (Previously presented) The semiconductor substrate according to claim 23, wherein said at least one wide trench is formed adjacent to said at least one narrow trench.
37. (Currently amended) The semiconductor substrate according to claim 23, wherein said ~~doped~~ HDP oxide comprises fluorine-doped HDP oxide.
38. (Previously presented) The semiconductor substrate according to claim 23, wherein said high density plasma (HDP) oxide comprises non-conformal HDP oxide.

Serial No. 09/883,981

5

Docket No. BU9-98-225DIV

39. (Previously presented) The semiconductor substrate according to claim 37, further comprising:

a thin oxide layer grown on said upper surface of said substrate, said thin oxide layer comprises a high-purity oxide.

40. (Canceled)
